

LENS BASICS QUIZ - CANON

A. EF B. EFS 2. EFS lenses are safe to use on Full Frame Canon DSLR camera bodies. A. True B. False 3. If you use an EFS lens some of the image will be "cropped" or cut off. A. True B. False 4. The focal length is measured in A. f/ numbers B. millimeters 5. The focal length can be one set length, like 50mm, this is called a "prime" lens. A. True B. False 6. Focal lengths can also be "zoom" lenses which offer a range of focal lengths, like 18-55mm. A. True B. False 7. You can choose any focal length and it will work well for all types of photography. A. True B. False 8. Smaller focal lengths, like 24mm, have wider angles of view than longer focal lengths like 200mm. A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm? A. f/4 B. f/5.6			Cano
2. EFS lenses are safe to use on Full Frame Canon DSLR camera bodies. A. True B. False 3. If you use an EFS lens some of the image will be "cropped" or cut off. A. True B. False 4. The focal length is measured in A. f/ numbers B. millimeters 5. The focal length can be one set length, like 50mm, this is called a "prime" lens. A. True B. False 6. Focal lengths can also be "zoom" lenses which offer a range of focal lengths, like 18-55mm. A. True B. False 7. You can choose any focal length and it will work well for all types of photography. A. True B. False 8. Smaller focal lengths, like 24mm, have wider angles of view than longer focal lengths like 200mm. A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	1. If you v	want a crop ser	nsor lens, should you buy EF or EFS lenses?
A. True B. False 3. If you use an EFS lens some of the image will be "cropped" or cut off. A. True B. False 4. The focal length is measured in A. f/ numbers B. millimeters 5. The focal length can be one set length, like 50mm, this is called a "prime" lens. A. True B. False 6. Focal lengths can also be "zoom" lenses which offer a range of focal lengths, like 18-55mm. A. True B. False 7. You can choose any focal length and it will work well for all types of photography. A. True B. False 8. Smaller focal lengths, like 24mm, have wider angles of view than longer focal lengths like 200mm. A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	А	. EF	B. EFS
3. If you use an EFS lens some of the image will be "cropped" or cut off. A. True B. False 4. The focal length is measured in A. f/ numbers B. millimeters 5. The focal length can be one set length, like 50mm, this is called a "prime" lens. A. True B. False 6. Focal lengths can also be "zoom" lenses which offer a range of focal lengths, like 18-55mm. A. True B. False 7. You can choose any focal length and it will work well for all types of photography. A. True B. False 8. Smaller focal lengths, like 24mm, have wider angles of view than longer focal lengths like 200mm. A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	2. EFS len	ises are safe to	use on Full Frame Canon DSLR camera bodies.
A. True B. False 4. The focal length is measured in A. f/ numbers B. millimeters 5. The focal length can be one set length, like 50mm, this is called a "prime" lens. A. True B. False 6. Focal lengths can also be "zoom" lenses which offer a range of focal lengths, like 18-55mm. A. True B. False 7. You can choose any focal length and it will work well for all types of photography. A. True B. False 8. Smaller focal lengths, like 24mm, have wider angles of view than longer focal lengths like 200mm. A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	А	True	B. False
4. The focal length is measured in A. f/ numbers B. millimeters 5. The focal length can be one set length, like 50mm, this is called a "prime" lens. A. True B. False 6. Focal lengths can also be "zoom" lenses which offer a range of focal lengths, like 18-55mm. A. True B. False 7. You can choose any focal length and it will work well for all types of photography. A. True B. False 8. Smaller focal lengths, like 24mm, have wider angles of view than longer focal lengths like 200mm. A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	3. If you ເ	use an EFS lens	some of the image will be "cropped" or cut off.
A. f/ numbers B. millimeters 5. The focal length can be one set length, like 50mm, this is called a "prime" lens. A. True B. False 6. Focal lengths can also be "zoom" lenses which offer a range of focal lengths, like 18-55mm. A. True B. False 7. You can choose any focal length and it will work well for all types of photography. A. True B. False 8. Smaller focal lengths, like 24mm, have wider angles of view than longer focal lengths like 200mm. A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	A	. True	B. False
5. The focal length can be one set length, like 50mm, this is called a "prime" lens. A. True B. False 6. Focal lengths can also be "zoom" lenses which offer a range of focal lengths, like 18-55mm. A. True B. False 7. You can choose any focal length and it will work well for all types of photography. A. True B. False 8. Smaller focal lengths, like 24mm, have wider angles of view than longer focal lengths like 200mm. A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	4. The foo	cal length is me	easured in
A. True B. False 6. Focal lengths can also be "zoom" lenses which offer a range of focal lengths, like 18-55mm. A. True B. False 7. You can choose any focal length and it will work well for all types of photography. A. True B. False 8. Smaller focal lengths, like 24mm, have wider angles of view than longer focal lengths like 200mm. A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	А	f/ numbers	B. millimeters
6. Focal lengths can also be "zoom" lenses which offer a range of focal lengths, like 18-55mm. A. True B. False 7. You can choose any focal length and it will work well for all types of photography. A. True B. False 8. Smaller focal lengths, like 24mm, have wider angles of view than longer focal lengths like 200mm. A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	5. The foo	cal length can b	pe one set length, like 50mm, this is called a "prime" lens.
A. True B. False 7. You can choose any focal length and it will work well for all types of photography. A. True B. False 8. Smaller focal lengths, like 24mm, have wider angles of view than longer focal lengths like 200mm. A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	А	. True	B. False
7. You can choose any focal length and it will work well for all types of photography. A. True B. False 8. Smaller focal lengths, like 24mm, have wider angles of view than longer focal lengths like 200mm. A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	6. Focal le	engths can also	be "zoom" lenses which offer a range of focal lengths, like 18-55mm.
A. True B. False 8. Smaller focal lengths, like 24mm, have wider angles of view than longer focal lengths like 200mm. A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	А	. True	B. False
8. Smaller focal lengths, like 24mm, have wider angles of view than longer focal lengths like 200mm. A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	7. You ca	n choose any fo	ocal length and it will work well for all types of photography.
A. True B. False 9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	А	. True	B. False
9. The aperture numbers in a lens description tell you the maximum aperture for that lens. A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	8. Smalle	r focal lengths,	like 24mm, have wider angles of view than longer focal lengths like 200mm.
A. True B. False 10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	А	. True	B. False
10. You have a lens with a maximum aperture of f/2. You want to upgrade to a lens that has a wider maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	9. The ap	erture number	s in a lens description tell you the maximum aperture for that lens.
maximum aperture. You should get the A. f/4 B. f/1.4 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	А	. True	B. False
 11. Aperture is noted as f/ and then a number, or as a ratio like 1: 1.8. A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm? 			
A. True B. False 12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	А	f/4	B. f/1.4
12. Zoom lenses often have a range of apertures. These numbers, for example on an 18-55mm f/3.5-5.6, mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	11. Apert	ure is noted as	f/ and then a number, or as a ratio like 1: 1.8.
mean that at the smallest focal length (18mm) the widest aperture is 3.5. What would be the widest aperture at 55mm?	А	True	B. False
A. f/4 B. f/5.6	mean tha	it at the smalle	
	А	f/4	B. f/5.6

See page two for answers and additional information.

ANSWER KEY: 1. B, 2. B, 3. A, 4. B, 5. A, 6. A, 7. B, 8. A, 9. A, 10. B, 11. A, 12. B
